Ask Better Questions (Part 1):
Smart Prompts to Boost Thinking and Dialogue

CONTEXT

- Clearly define the approach or angle from which you want the AI to approach the subject.
- Clearly describe the initial situation or current problem.
- Set the context and ask the AI to complete the challenges you have proposed.
- Ask the AI to describe or take into account the specific context of the situation or problem.

OBJECTIVES & STRATEGIES

- Define specifically the desired result or the desired end state.
- Clearly define the objective to be achieved.
- Ask the AI to provide the steps, strategy and/or solution to move from the initial state to the objective to be achieved.
- Ask the AI to propose several paths to follow, several different strategies to solve the problem.
- Ask the AI to explain the concept, situation or problem in question and the different possible strategies.

RESULTS

- Define the tone, style and perspective that the AI should adopt in its response.
- Clearly specify the objective or action that the AI should accomplish (solve a problem, generate content, provide an analysis, etc.).
- Clearly define what you want the AI to do (write a text, a summary, an analysis)
- Give precise instructions on the style, format or expected elements of responses.
- Encourage the AI to propose concrete actions or steps to be taken to address the problem.
